

A/V requirements for Andy Vance

In order to maximize your investment in Andy Vance's presentation, please plan to have the following technology in place:

A/V projector with a minimum of 1500 lumens and screen

Wireless lavalier microphone

Full house lights

Audio out from Andy's computer

Unless we are informed otherwise, Andy's visuals are prepared in 4X3 format and VGA video output from his computer. If your A/V setup requires 16X9 images or a different output, please specify those needs in advance.
